

Q1 2024 Marketing Performance Report

Digital Channels Analysis & Optimization Recommendations

Prepared by Marketing Analytics Team | April 2024

Executive Summary

Q1 2024 showed strong growth across all digital channels with total revenue of \$2.8M, up 24% YoY. Paid social delivered the highest ROI at 4.2x, while organic search traffic grew 31%. Key areas for Q2 optimization include email re-engagement campaigns and TikTok content scaling.

Total digital revenue reached \$2.8M in Q1, exceeding target by 12%. E-commerce revenue grew 28% to \$1.9M driven by improved conversion rates. SaaS subscriptions contributed \$620K with a 15% increase in annual plan upgrades. Services revenue remained stable at \$280K.

Paid Social (42% of revenue): Facebook/Instagram campaigns generated \$1.18M with a 4.2x ROAS. Top performing: lookalike audiences from high-LTV customers. Organic Search (28%): 31% traffic increase driven by content hub launch. 45 new keywords ranking in top 10. Email (18%): Revenue per email improved 22% through personalization. Open rates averaged 24.3%. Paid Search (12%): Google Ads contributed \$336K. Brand search CPC decreased 15%.

Total new customers: 4,200 (up 19% QoQ). Customer acquisition cost decreased from \$42 to \$36. Highest quality leads came from content marketing (38% conversion rate). Social proof campaign drove 2x referral signups in March.

1) Scale TikTok content — pilot showed 3.1x engagement vs Instagram Reels. 2) Launch email win-back series targeting 12,000 dormant subscribers. 3) Invest in video SEO — YouTube tutorials driving 8min avg watch time. 4) Test AI-personalized landing pages for paid traffic. 5) Expand influencer program from 15 to 30 creators.
