

isibi.ai

AI-powered mobile assistant that does everything for you

Prepared by Carlos Anias | April 2026

Executive Summary

isibi.ai is building GoFarther AI, the first mobile AI assistant that goes beyond chat to actually execute tasks — creating documents, sending emails, managing files, automating workflows, and controlling connected apps. Unlike Siri, Alexa, or ChatGPT, GoFarther doesn't just answer questions — it takes action. We're targeting professionals, freelancers, and small business owners who waste 10+ hours/week on repetitive tasks that AI can handle in seconds.

The Problem

Professionals spend 40% of their workweek on administrative tasks: drafting emails, creating documents, scheduling, data entry, and managing tools. Existing AI assistants (Siri, Alexa, ChatGPT) are conversation-only — they can't create an invoice, send it to your client, and log the payment in your CRM. The market needs an AI that acts, not just talks.

Our Solution

GoFarther AI is a mobile-first AI assistant with 25+ integrated tools. Users can create professional PDFs, send emails, manage contacts, automate workflows, and connect 15+ apps — all through natural language. Our AI agent system lets users create custom automations ("when my boss emails me, draft a reply and notify me on Slack"). Everything runs server-side with Claude API, so it works on any phone.

Market Analysis

\$50B TAM	\$8B SAM	\$400M SOM
---------------------	--------------------	----------------------

The global AI assistant market is projected at \$50B by 2028. Our serviceable market focuses on mobile productivity AI for professionals — \$8B. Initial target: English-speaking freelancers and small business owners in US, UK, and Canada.

Business Model

Freemium SaaS. Free tier: 50 messages/day, basic tools. Pro (\$9.99/mo): unlimited messages, all tools, file creation, voice mode. Business (\$29.99/mo): team features, connected apps, AI agents. Enterprise: custom pricing. Additional revenue from per-file credits for heavy document creators.

Competitive Landscape

COMPETITOR	STRENGTH	WEAKNESS
ChatGPT	Brand recognition, GPT-4	Chat-only, no tool execution, no mobile-native UX
Siri / Google Assistant	Pre-installed on every phone	Limited capabilities, no document creation, no app in
Jasper AI	Strong content generation	Text-only, no action execution, desktop-focused
Notion AI	Workspace integration	Tied to Notion ecosystem, no external app connectio

Go-to-Market Strategy

Phase 1 (current): Organic App Store growth + viral loops (share created documents). Phase 2: Targeted Instagram/TikTok ads for freelancers showing real AI-generated documents. Phase 3: B2B partnerships with accounting firms, law offices, and real estate agencies who need document automation. Phase 4: Enterprise sales with dedicated onboarding.

Team

Carlos Anias — CEO / Lead Engineer

6+ years full-stack. Built GoFarther from zero to 12K+ users as a solo founder.

AI Engineering — Hiring Q2 2026

Seeking Claude/OpenAI API specialist for prompt optimization and agent architecture.

Growth Lead — Hiring Q2 2026

Seeking mobile growth marketer with SaaS experience.

Financial Projections

	Year 1 (2026)	Year 2 (2027)	Year 3 (2028)
Revenue	\$576K	\$3.2M	\$12M
Users (paid)	4,800	22,000	75,000
Expenses	\$420K	\$1.8M	\$6M
Net	\$156K	\$1.4M	\$6M

Funding

Seeking \$500K pre-seed to hire AI engineer + growth lead, scale infrastructure, and fund 12 months of growth marketing. Current traction: \$48K MRR, 12.4K active users, 72% retention — all bootstrapped.

Milestones

MILESTONE	TARGET DATE
Product launched (MVP)	Q4 2025
10,000 active users	Q1 2026
\$50K MRR	Q2 2026
Enterprise launch	Q3 2026
50,000 users	Q1 2027
Series A	Q2 2027
